DATA SHEET

Reagent: ☒ Panel of 60 International HIV-1 Isolates

Catalog Number: 11412

Lot Number: 100180

Release Category: C

Provided: 1 vial each of cell-free virus. Total of 59 isolates, see Table for descriptions.

Isolates can also be ordered individually by catalog number.

Please note: Recent sequencing analysis showed vials labeled as Cat# 11243, HIV-1 KER2018 (00KE_KER2018) Virus are actually Cat# 11242, HIV-1 KER2008 (00KE_KER2008) Virus.

Host Strain: Human PBMCs.

Sterility: Negative for mycoplasma, bacteria and fungi.

Description: This International Panel of HIV-1 virus isolates representing six major globally prevalent strains of genetically and biologically characterized HIV-1 isolates (Brown, BK et al, *J Virology* **79**(10): 6089, 2005) consists of ten viruses each from chronically infected individuals of clades A, B, C, D and circulating recombinant forms, CRF01_AE and CRF02_AG. This panel consists of 49 nonsyncytium-inducing virus isolates that use CCR5 as a major coreceptor and 11 syncytium-inducing isolates that use only CXCR4 or both co-receptors, and contains both neutralization-sensitive and resistant isolates. This collection provides an important resource for standardization of immunogenicity assessment in HIV-1 vaccine trials (see Table 1 for genetic and biological characterization of 60 international HIV-1 isolates).

[Table I. HIV-1 International Panel of HIV-1 Isolates.](#)

Special Characteristics: **Please be sure to submit the UNAIDS form below with your order request:**
[WHO-UNAIDS MTA](#).
(Required for the release of reagents #1650, #1952, #2200, #2993)

ALL RECIPIENTS OF THIS MATERIAL MUST COMPLY WITH ALL APPLICABLE BIOLOGICAL, CHEMICAL, AND/OR RADIOCHEMICAL SAFETY STANDARDS INCLUDING SPECIAL PRACTICES, EQUIPMENT, FACILITIES, AND REGULATIONS. NOT FOR USE IN HUMANS.

Recommended Storage:	Liquid nitrogen
Contributor:	Various; See Table.
