

## BEI Resources Material Transfer Agreement (MTA) Addendum

### Addendum to registration agreement for the BEI Resources Material Transfer Agreement (MTA)

#### Applicable to sMDCK cell lines (collectively the “Materials”), (NR-59612 and NR-59613)

Recipient agrees that sMDCK cell line, distributed as NR-59612 and NR-59613, donated to BEI Resources, will only be used solely for noncommercial United States Government purposes to support development and manufacture of vaccines and biologics, including use of Materials in Phase I and Phase II clinical trials; non-GMP and GMP-compliant product development; and assay development and testing (the “Permitted Use”). For clarity, Permitted Use shall not extend to any commercialization activities or product development activities of Phase III clinical trials, or beyond that milestone of product development. The Recipient also agrees not to transfer the Materials to any other party. Any further use of the Materials (including, without limitation for further clinical trials, bioproduction, commercialization or commercial manufacturing) shall require a license agreement with ATCC on terms to be agreed by the parties.

The Recipient is responsible for adhering to the terms of the Material Transfer Agreement (MTA) with BEI Resources which was signed upon registering with BEI Resources. By signing below, the Recipient acknowledges they will abide by the terms of the MTA and this Addendum which includes a restriction on commercial use. The recipient will not use or incorporate the Materials for any commercial purposes.
